How can we monitor Lab Orders and their errors?

GT Operational Dashboard with Lab Order support

Find the Dashboard here: [Lab Order Operational Health](#)

Dashboard Components:

- **Unregistered Kits:** This report shows all of the kits that have been sent to the distribution center that have yet to be registered
- **Cancelled Lab Orders:** This report shows all lab orders that have been cancelled by 10X due to reshipping or some other reason OR that have been cancelled by the lab
- **Samples Rejected:** This report will show all samples that have been rejected by the lab.
- **Unsupported State:** This report will show all samples that have been cancelled for going to a state that is not supported. The cancellation could be from the Lab provider or 10x.
- **Orders Held**
 - Missing Consent
 - Missing/Incorrect Shipping Information
 - Provider Invalid
 - Mismatch Demographic Data
 - Other
- **Results Held:** This report will show all results that have been placed on hold due to one of the following reasons:
 - Missing Demographics
 - Missing Consent
 - PAM
- **Samples Not Received by Labs:** This report will show all Opportunities with Lab Order record that is in the Opp stage of Kit Sent.
- **Lab Order Results Outstanding:** This report will show all Opportunities with Lab Order records that are in the status of Results Held or Sample Received.

Lab Order?

ment on this Dashboard: [Lab Order Operational Health](#)

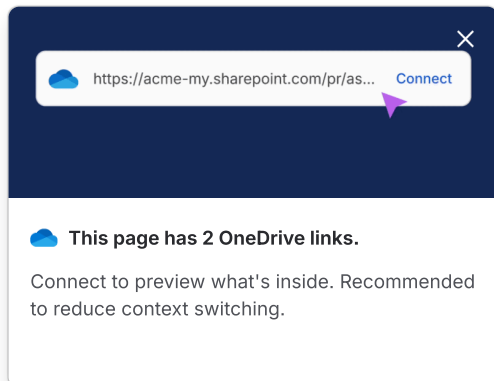

This component shows all Genetic Tests with an error message.

Orders in Error SOP

1. Open the Dashboard [Lab Order Operational Health](#) and find the “Orders in Error” component.
2. Click on “View Report”.
3. You will see the Following possible Error Messages:
 - a. Country is missing
 - b. Email is missing on account
 - c. Kit ID is Missing
 - d. Specimen Compromised
4. Click on a record in one of the error sections and follow instructions for how to resolve based on the error message:

Error: Country is missing

1. Open the Lab Order either via the Opportunity or Account related records. Verify the product on the Lab Order is a *Virtual* product. Example being the Precision Genetic Test - Virtual or Methylation Genetic Test - Virtual.
 - a. Click on the **Update Order** button on the Lab Order.

ship a kit due to the sample being compromised.

ds and this will close the Lab Order and generate a new one.

1. Lab Order Status: Rejected

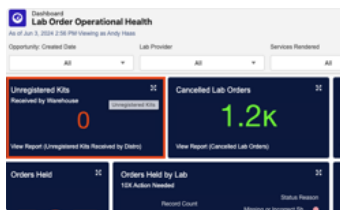

ii. Status Reason: Sample Invalid

- Marketing is working on an email template that will be sent out for “Rejection” samples. This process will be automated once the email template and development have been completed. The Patient will automatically be reshipped a kit and sent an email explaining the rejected sample in this future state.

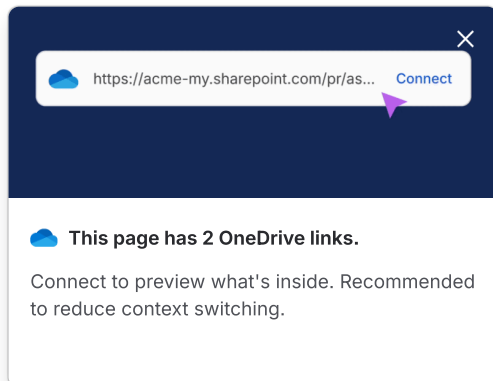

Unregistered Kit SOP

You can see a Scribe of this SOP [here](#)

1. Open the Dashboard [Lab Order Operational Health](#) and find the “Unregistered Kits” component.

2. Click on “View Report”.
3. Select a record in the report and open it in a new tab.
4. Locate the Kit ID on the Patient’s Lab Order.
5. Locate the patient’s contact info and contact the patient.
6. Explain to the patient that they did not register their kit and we need them to do so in order for the lab to process it. Provide them with the Kit ID and the link to the website to register.
7. Direct the patient to this website to register the kit: <http://mywellness.10xhealthsystem.com>
8. Patient will need to have the following information for the MyWellness registration:
 - a. Kit ID
 - b. Name
 - c. DOB

register the kit and is getting an error, you can Register the Kit
follow these steps.
patients Account.

- b. Confirm that the *Kit Id* and *Lab Provider* is listed on the Lab Order and the *Status* is set to “Ordered”.
- c. Click the **Register Kit** button.
- d. Enter in the patient’s demographic information:
 - i. Name
 - ii. DOB
 - iii. Gender
 - iv. Height (in inches)
 - v. Weight (in pounds)
 - vi. Approver
 - vii. Reason for changes
 1. Reason for Change: Patient unable to register kit on MyWellness platform.
- e. Click the **Submit** button.
- f. You will see that the Kit Registered checkbox has now been checked on the Lab Order, and the registration information has now been sent to the lab.

Lab Provider Name	Novogenia
Kit Id	AM1000144311 

Cancelled Lab Orders

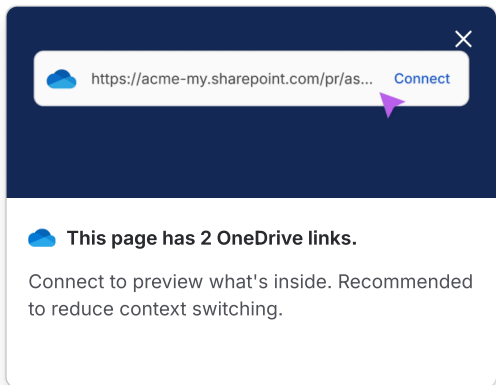

Look at the **Cancelled Lab** component on this Dashboard: [Lab Order Operational Health](#)

This component shows all lab orders that have been cancelled by the lab.

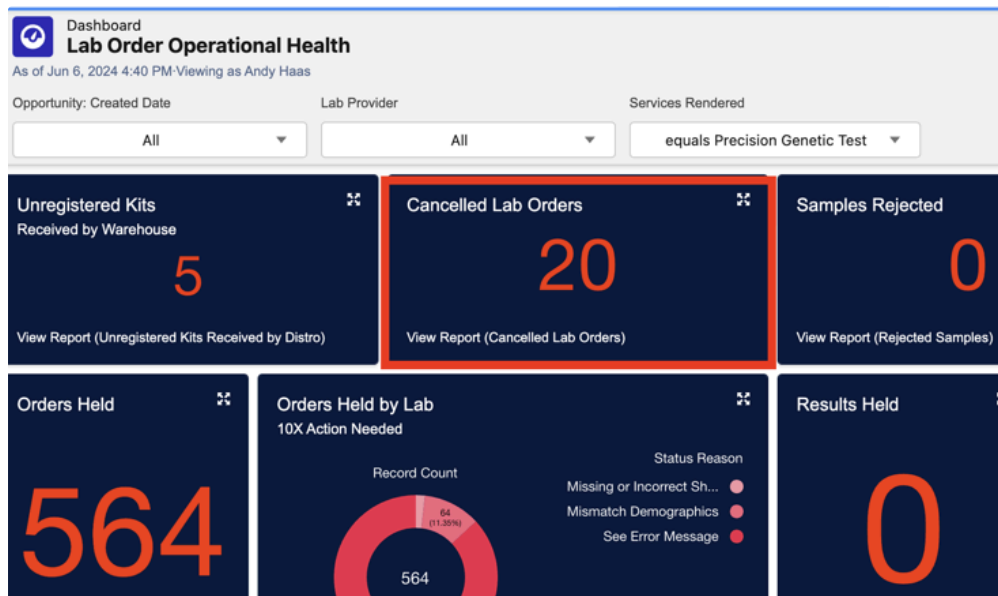

Reason for Cancelled orders are the following:

- Non supported state
- Other
- Closed Lost

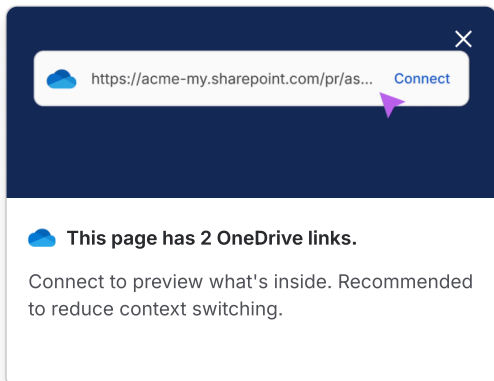

Cancelled Lab SOP

[Lab Order Operational Health](#) and find the “Cancelled Lab” component.

2. Click on “View Report”.
3. Select a record in the report and open it in a new tab.
4. For records where *Non-Supported State* is listed as the **Status Reason** field:
 - a. Use the **Reorder** button to send a new Lab Order request to a different lab. See either SOP for instructions:
 - i. [Lab Order Buttons and How to Use them](#)
 - ii. [Unsupported States SOP](#)
 - b. Or you can attempt to schedule the patient for an In-Person lab (genetic test swab) at one of the 10x Offices. You will need to change the product to In-Person if the patient wants to go with this option. See the [Switching GT Products SOP](#) for instructions on how to do that.
5. For records where *Other* is listed as the **Status Reason** field or where there are unknown issues that may arise. Create a Help Desk ticket for these until we are able to determine other common errors.
 - a. Email helpdesk@10xhealthsystem.com and provide a link to the Lab Order and an explanation of what is wrong.

is listed as the **Status Reason** there is nothing to do.

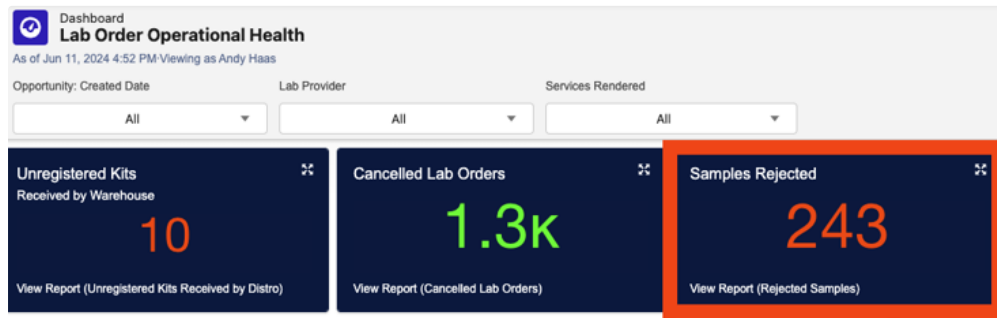

Component on this Dashboard: [Lab Order Operational Health](#)

les that have been rejected by the lab due to insufficient

Rejected Samples SOP

You can see a scribe for this process [here](#).

1. Open the Dashboard [Lab Order Operational Health](#) and find the “Samples Rejected” component.

2. Click on “View Report”.
3. Select a record in the report and open it in a new tab.
4. Click on the Lab Orders hyperlink in the Related List Quick Links from the Opportunity or Account.
5. When a patient has 3 Rejected Lab Orders (3+ in the Reship field), they will show up on the Dashboard. These patients will need to be contacted and charged a Reship Fee (if applicable).
6. Please follow the instructions in the [Reship Kit SOP](#).
7. If the sample was rejected by the lab due to sample compromised or insufficient DNA, open the Lab Order record and click on the Reship button.
 - a. Select the patients correct shipping address or manually enter in the correct address.
 - b. Enter Ashlee Edwards into the Approver Field.
 - c. Note if the sample was compromised or insufficient DNA in the Reason for Change section.

- The first 3 reships there is nothing to do manually. A new Lab Order will get created and a new kit will be shipped to them automatically.

If the External Provider Configuration Auto-Reship on Rejection is enabled a reship will
Reship on Rejection is disabled then this will need to be

https://acme-my.sharepoint.com/pr/as... [Connect](#)

Connect to preview what's inside. Recommended to reduce context switching.

approval to override the shipping fee or require it.

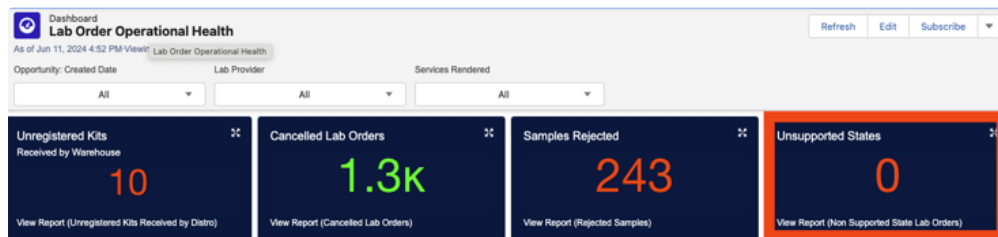

Non Supported State Lab Orders

Look at the **Unsupported States** component on this Dashboard: [Lab Order Operational Health](#)

This component will show all samples that have been cancelled due to a shipping address in a state that is not supported by the Lab Providers. The cancellation could be from the Lab provider or 10x.

Non Supported State SOP

1. Open the Dashboard [Lab Order Operational Health](#) and find the “Unsupported States” component.

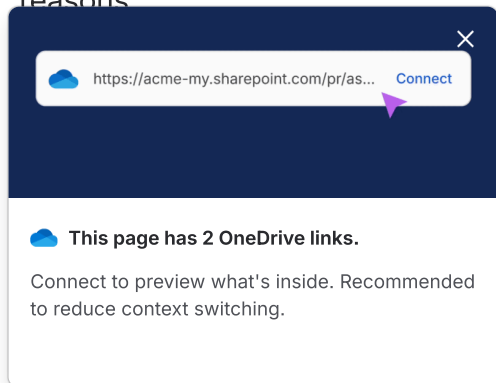

2. Click on “View Report”.
3. Select a record in the report and open it in a new tab.
4. Use the **Reorder** button to send a new Lab Order request to a different lab. See either SOP for instructions:
 - a. [Lab Order Buttons and How to Use them](#)
 - b. [Unsupported States SOP](#)

Lab Orders Held

Look at the **Order Held** component on this Dashboard: [Lab Order Operational Health](#)

This report will show all orders that have been placed on hold due to one of the following reasons:

have have consent from the patient to process their lab order.

Information - Shipping information is incorrect or missing. You information.

ted cannot support this order, a different Lab Provider will ice.

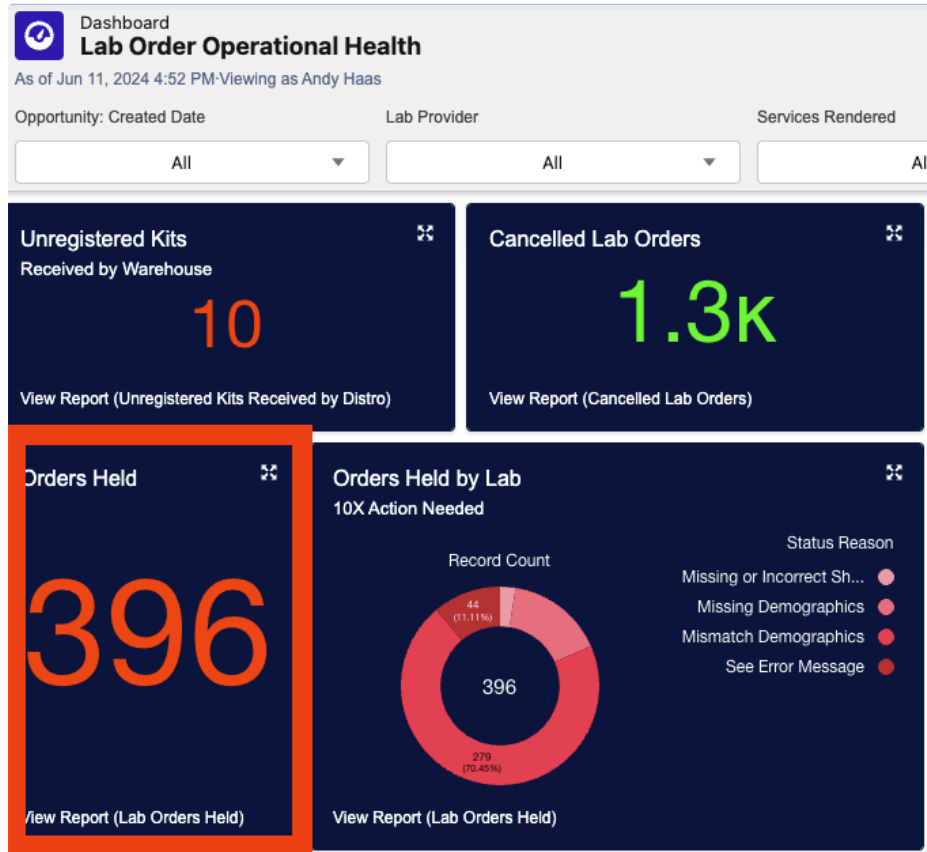

If a manual demographic form was included in the kit and the into entered on that form does not match the demographic info on the lab order, the lab will

hold the results until the info is updated on the lab order.

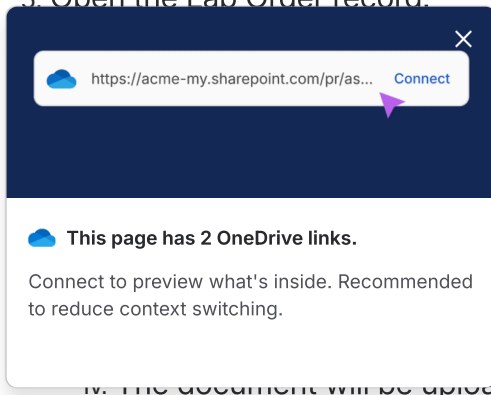

- **Other:** For any other unknown errors, please submit a Help Desk ticket. Write an email to helpdesk@10xhealthsystem.com

Lab Orders Held SOP

1. Open the Dashboard [Lab Order Operational Health](#) and find the “Results Held” component.

2. Click on “View Report”.
3. Select a record in the report and open it in a new tab.
4. Click on the Lab Orders hyperlink in the Related List Quick Links from the Opportunity or Account.
5. Open the Lab Order record.

ments button.

igned PA then you will be prompted to choose the correct one.

PA it will show the PA that will be uploaded.

iv. The document will be uploaded to the lab.

v. If there is an error you will be presented with error message. If no error occurs you will be presented with a success message.

b. **Missing/Incorrect Shipping Information:**

i. Obtain the correct shipping address and update the Opportunity using the **Reship** button if a Lab Order has not been created yet. See SOP for instructions:

1. [📄 Lab Order Buttons and How to Use them](#)

c. **Provider Invalid:**

i. Select a different Lab Provider for this service. Use the **Reorder** button. See SOP for instructions:

1. [📄 Lab Order Buttons and How to Use them](#)

d. **Mismatch Demographic Data:**

i. Use the Update Lab Order button to override the data the lab received on the manual form. (Need SOP on how to use Update Lab Order Button)

e. **Other:**

i. For any other unknown errors, please submit a Help Desk ticket. Write an email to helpdesk@10xhealthsystem.com

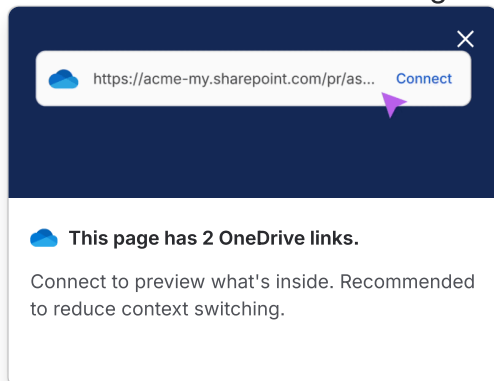

Results Held

Look at the **Results Held** component on this Dashboard: [Lab Order Operational Health](#)

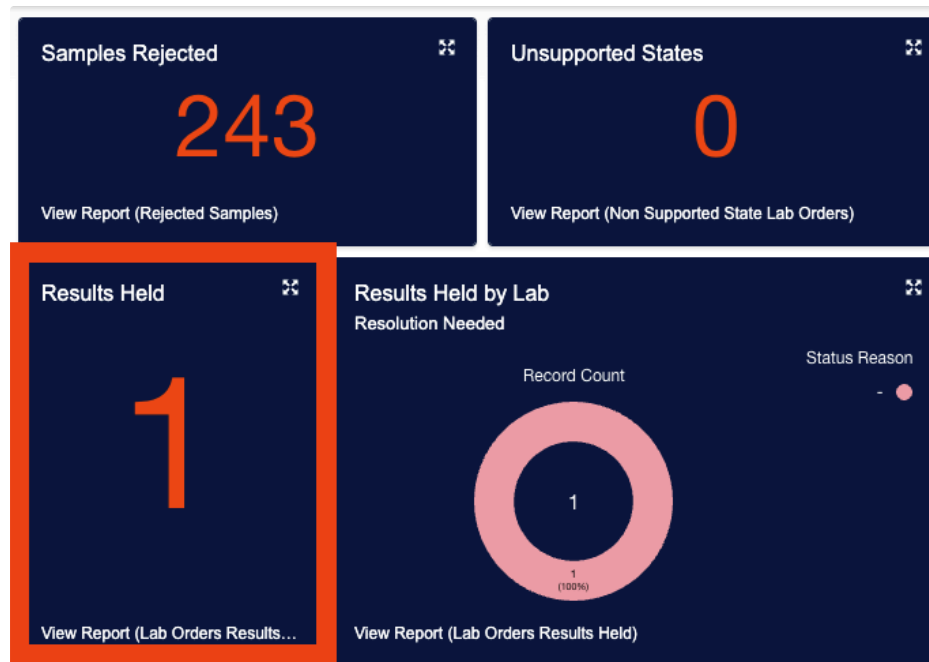

This report will show all results that have been placed on hold due to one of the following reasons:

- **Missing Demographics** - The patient data is missing and 10X needs to get the updated information (Use Update Lab Order button when you obtain the missing information from the patient- need SOP)
- **Missing Consent** - We do not have have consent from the patient to process their lab order.
- **PAM** - There was something wrong and a case was created in SF for the PAM team to

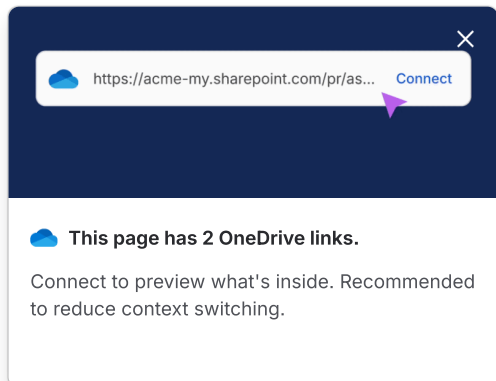

red from any other teams. Please reach out to the help desk
ing these records.

[Lab Order Operational Health](#) and find the “Results Held” component.

2. Click on “View Report”.
3. Select a record in the report and open it in a new tab.
4. Click on the Lab Orders hyperlink in the Related List Quick Links.
5. Open the Lab Order record
6. Note the Status Reason.
 - a. **Missing Demographics:**
 - i. Obtain the missing demographic info from the patient.
 - ii. Click on the **Update Order** button.
 - iii. Enter in the patient’s full address.
 - iv. Enter Ashlee Edwards into the Approver Field.
 - v. Note what information was missing in the “Reason for Change” section.
 - vi. Click Submit.
 - vii. The lab order will be marked as closed and a new one will be created.

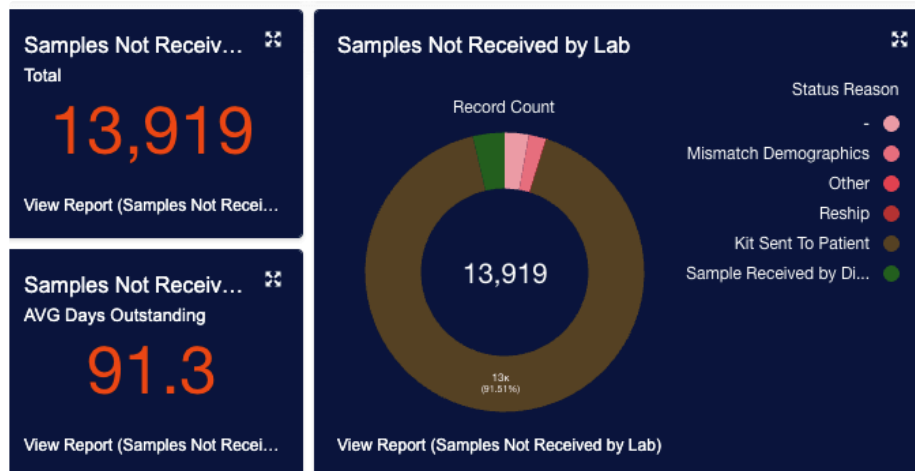

ments button. If the lab supports the use of this button, it will the patient signed to the lab. If the lab does not support the get an error that you cannot proceed.

1 team is working on resolving this issue.

Samples Not Received by Lab

Look at the **Samples Not Received by Lab** component on this Dashboard: [Lab Order Operational Health](#)

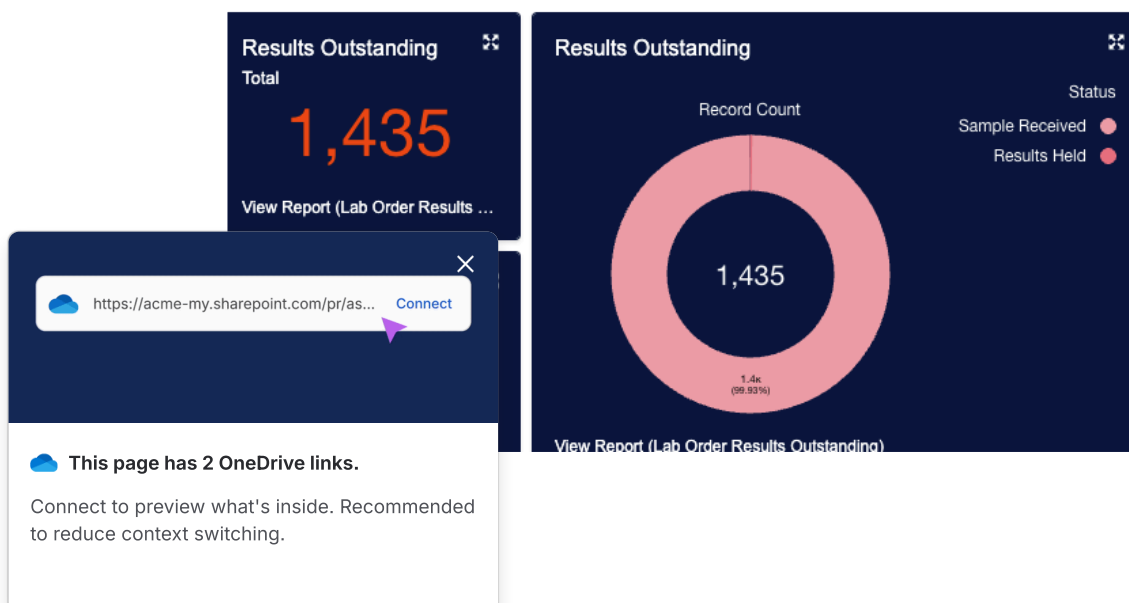

This component will show all Opportunities with Lab Order record that is in the Opp stage of Kit Sent.

End User Resolution:

Follow up with the patient to inquire why they haven't sent the Kit back to the lab.

Lab Order Results Outstanding

Look at the **Results Outstanding** component on this Dashboard: [Lab Order Operational Health](#)

This report will show all Opportunities with Lab Order records that are in the status of Results Held or Sample Received

End User Resolution:

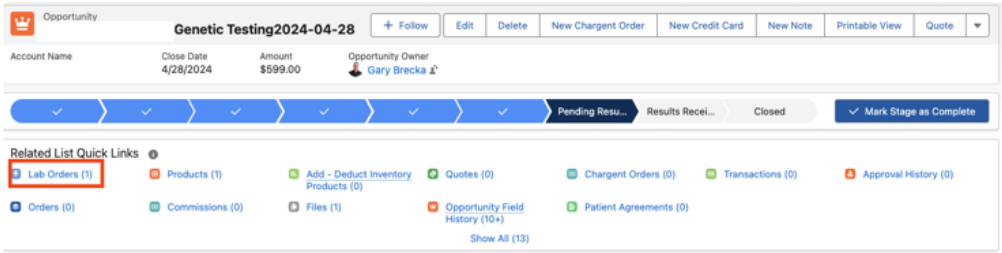

Results Held: See the [Results Held](#) section for SOPs.

Sample Received: We are waiting for the lab to process the sample. Nothing required from 10x to resolve.

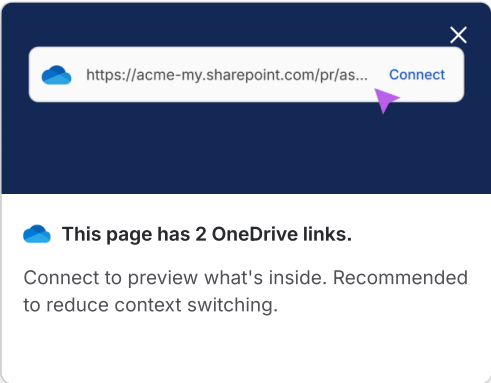

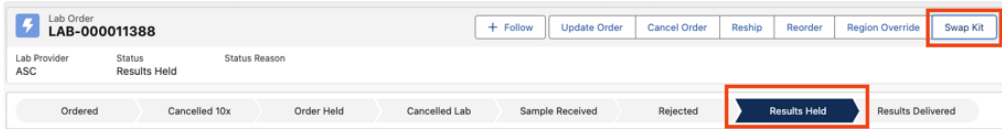

Kit Swap:

⚠ Swap Kit feature will for now work only for Lab Orders that have a related Opportunity record

- 1. Open the Opportunity or Account of the person whose Kit ID was used by another patient.
AKA If Jane Doe used John Doe's Kit, open John Does GT Opportunity.
- 2. Open the Lab Order on the Opp.

- 3. Click on **Swap Kit** button. **Note:** The stage cannot be Results Delivered or this tool will not work.

Swap Kit

This screen flow is meant to be used when two lab orders for two different people were sent to the same address and each completed by the wrong person.

These Lab Orders will need to have their Opportunity values swapped so that the each Lab Order is associated with the correct Opportunity and Account.

Find the two Lab Order records who's Opportunity value you would like to swap using the lookups below. Once you have found them, navigate to the next page to confirm the details and finalize the exchange.

11. The Lab Orders/ Kit Ids have now switched to the other person's account. You should see the new person's name, DOB and gender with the other person's Kit ID. AKA Jane Doe's demographic info will now have John Doe's Kit ID on her Opportunity.
12. Existing lab order gets cancelled, status set to swapped kit. A new lab order will be created with the patient demographic info and the Kit ID, Lab Order ID and Request ID will be swapped and will have "-SWAPPED-Date/Time" added to them.

In Person Unknown Kit Registration:

⚠ In the future this will be handled via MWP and will not require a Opportunity record.

1. Create an In-Person GT Opportunity:

- a. Navigate to the Patient's Account and click the "New Opportunity button in the upper right

also hover over the Opportunities quick link in the Related List

at New.

click "Next" or "Continue"

and add the patient's account name

anything, this will be overwritten

iv. **Forecast Category:** Pipeline

v. **Close Date:** select today's date

vi. **Stage:** New Purchase

vii. **Shipping:**

1. Uncheck "Requires shipping" box.

2. Check "Same as Shipping Address" if this is the same, or enter in the shipping address manually. Note: An address is still required even if this is an In-Person kit.

viii. **Transaction Type:** Prepaid

ix. **Payment Type:** Full

x. **Transaction Source:** Direct Sale

xi. **Referred By:** List yourself.

xii. Click **"Save"**.

d. Add the In-Person PGT product (DO NOT add demographic info) and then use the pop-up fields at the top right of the screen to add the following information:

i. Name

ii. DOB

iii. Gender

iv. Height

v. Weight

atically populate on the product.

If the person is VIP they may need a Booklet shipped to them. Please check in with your manager about how to get a booklet sent to them. This process has not been developed yet.

NOTE: In Person PGTs also need a patient agreement, as we need consent to release these results. We need a way for these patients to sign a consent and for us to document that the consent was signed. This has not been developed yet.
