Lab Order Buttons and What they Do:

Button Name	Action	When to Use it:	Visibility Logic
Reorder	Cancels the existing Lab Order and creates a new Lab Order with a different lab provider (selectable). Sets the Opportunity to Kit Needs Sent Stage. Note: Shipping Address cannot be changed with this button.	For when you want to change lab providers and send a new kit to the same address.	Status not equal to: • Cancelled • Rejected Product requires Shipping= true (references product, aka Virtual or In Person)
Reship	Cancels the existing Lab Order and creates a new Lab Order with the same lab provider. Sets the Opportunity	For when a kit was shipped to the patient but a new one needs to be sent. Possible reasons why to use this button:	Status not equal to: • Cancelled • Rejected Product requires Shipping= true (references

	to Kit Needs Sent Stage. Note: Shipping Address can be changed with this button	• Demographic Mismatch • Update shipping address • Sample Rejected • Kit Defective • Kit lost in Transit	product, aka Virtual or In Person)
Submit Order	Resubmits an API call to the lab (and 3PL if a PGT) with the order information. Note: This will request to send a kit if the kit was never sent originally (API call was not successful).	When the initial API call wasn't successful, so you need to trigger it again. Possible reasons why to use this button: • Shipping Address was not validated (Tier 1 use) • API error did not submit order (Tier 2 use)	Status not equal to: • Cancelled Date Sent to Distribution = Empty
Submit Electronic Order	MGT Only: Resubmits an API call to the lab with the order information. Note: This button does not work for PGT or	When the lab received the kit back from the patient, but they never received patient information about the kit, they need a new	SF User role= PSR, System Admin or Can View PAM Permission Status= Not Cancelled

	Precision supplement/ book orders.	Electronic Order sent to them to be able to process the kit. (TIQ button)	
Update Order	Novogenia/ 3PL ONLY! Sends a new API call to the lab when demographic information needs to be updated or a PGT kit needs to be registered. Note: This does not work for the MGT labs.	When you need to manually register a PGT kit or correct PGT demographic info/ address info. Note: For demographic corrections you might need to email the lab to confirm the change.	Status not equal to: • Cancelled • Rejected • Sample Received
Region Override	Cancels the existing Lab Order and creates a new Lab Order with a different lab provider (selectable). Sets the Opportunity to Kit Needs Sent Stage.	Use this to change a lab provider to the correct provider for the patient's address: NY: ASC Canada: CellScience Note: You can use the Reorder button to do this as well.	Status not equal to: • Cancelled • Rejected Product requires Shipping= true (references product, aka Virtual or In Person)

Register Kit	Registers a PGT Kit ID with Novogenia.	Can use to register and In-Person or Virtual PGT Kit. You will no longer be able to register a kit from the Opportunity.	Status not equal to: - Cancelled - Rejected Is Kit Registered=False
Set Kit ID	Sets a Kit ID on the Lab Order and Opportunity if Kit ID is missing for MGTs and PGTs. Does not update the Labs in any way, only updates records in SF.	Whenever Kit ID is missing for any lab you can use this button to set it on the Lab Order and Opportunity.	Status not equal to: - Cancelled - Rejected Kit Id= blank
Cancel Order	This button does not work	Never, email the lab to cancel.	n/a
Swap Kit	This button does not work	Never	n/a

Lab Order Status and Status Reason Definitions:

Status	Definition	Status Reasons	Definition	Opportunity Stage
Ordered	The Lab has received a Kit request and is in process of shipping it to the patient.	<i>Kit Sent to Patient</i>	The Lab has sent the kit to the patient	Kit Sent

		<i>Patient Received Kit</i>	The Patient has received the kit	Kit Sent
		<i>Sample Received by Distribution</i>	This is PGT specific as the patient sends Kit back to Distribution Center and then they send Kit to the lab.	Kit Sent
		<i>Kit Sent to Lab</i>	The Patient or Distribution Center has sent the kit to the lab	Kit Sent
		<i>Pending Fulfillment</i>	Order has been sent but it hasn't been fulfilled.	Kit Sent
Order Held	Something needs done on the order manually to allow the order to be processed.	<i>Consent Missing</i>	We do not have consent from the patient to process their DNA	Kit Needs Sent

		<i>Missing/Incorrect Shipping Information</i>	We need to gather the correct shipping address and update the opportunity.	Kit Needs Sent
		<i>Provider Invalid</i>	Lab Provider we set is not a valid provider for this service.	Kit Needs Sent
		<i>Mismatch Demographic Data</i>	The demographic data they entered on the release form doesn't match the DNA sample they sent.	Kit Needs Sent or Kit Sent (PGT Only)
		<i>Other</i>	Any unidentified errors.	Any Stage
		<i>See Error Message</i>	Any identified errors will show in the Error Message Field.	Any Stage

		Stalled	Multiple attempts were made to get missing information from the patient, but they did not respond. Unable to deliver kit or results depending on situation.	Any Stage but status will be Stalled.
Cancelled Lab	Cancelled by the lab	• Non-Supported State • Other	• The state is not allowed by the lab • Anything else	There should be a reship and then the stage will depend on the progress of the reshipped Lab Order.
Sample Received	The Lab has possession of the Kit and has confirmed it was received	Analysis in Progress	The Lab has started their analysis of the Kit	Pending Results
		Analysis Complete	The Lab has completed their	Pending Results

			analysis of the Kit	
Rejected	The Kit was rejected by the Lab with not enough sample data	<i>Sample Invalid</i>	Sample was unable to be analyzed due to not enough genetic material	There should be a reship and then the stage will depend on the progress of the reshipped Lab Order.
Results Held	Something prevented results from being delivered to the Patient.	<i>Missing Demographics</i>	The patient data is missing and 10x needs to do get the updated information.	Pending Results
		<i>Consent Missing</i>	We do not have consent from the patient to process their DNA	Pending Results
		<i>PAM</i>	There was something wrong and is need of human intervention. A case has been created in	Pending Results, possibly with a Stalled Status.

			PAM for that team to resolve.	
Results Delivered	Results were delivered to the patient via email or MyWellness portal.	<i>No Status Reason provided for this Status</i>		Results Delivered to Client. Unless there is a PAM case and results were not delivered on the Opp. In this case, change the Status on the Lab Order back to Sample Received.
Cancelled 10X	Cancelled by the 10x (refund or sent to another lab or reshipped)	<i>Patient Refunded</i>	The patient was refunded	Closed Lost with a Refunded Status
		<i>Changed Lab</i>	10x changed the lab	There should be a reship and then the stage will depend on the progress of the

				reshipped Lab Order.
		Swapped	2 or more patients swapped their kits.	There should be a reship and then the stage will depend on the progress of the reshipped Lab Order. If no reship, reach out to TIQ team.
		Reshipped	When a request for a new kit is sent to the same lab provider. Ex. bad delivery, kit never arrived.	There should be a reship and then the stage will depend on the progress of the reshipped Lab Order.

Lab Order State Machine (Slightly Outdated)

Who Has Access to Lab Orders? User Roles:

Role	Process	Permission
Sales	Be able to sell PGT/PBT/GHT/MGT/etc. products through a Opportunity and ensure that the order creates a Lab Order which is submitted to the lab.	Read Lab Orders
Sales Manager	Be able to sell PGT/PBT/GHT/MGT/etc. products through a Opportunity and ensure that the order creates a Lab Order which is submitted to the lab.	Read Lab Orders
Operations/Admin	Be able to view Opportunities and take payment on the Opportunity and approve the opportunity, which will automatically create the Lab Order to be submitted to the lab.	Create and Edit Lab Orders
Finance	Be able to view and report into what sales have been done for	Read Lab Orders

	a specific product.	
System Integration	Be able to create Lab Orders via a Restful API endpoint that will handle Account creation or updates and ensure that the order has been submitted successful.	Create and Edit Lab Orders via the API
TIQ Team	Be able to view the details of a lab order and correct any incorrect patient identifying data and/or fixing any integration issues that may have happened within the API communication.	Read and Edit Lab Orders
PAM Team	Be able to view the details of a lab order and correct any incorrect patient identifying data and/or fixing any integration issues that may have happened within the API communication.	Read and Edit Lab Orders
