Objective

The purpose of this document is to give users and leadership a reference point for the different statuses and stages that help bridge the gap when Lab Orders are stuck.

Salesforce

Opportunity Stages (Genetic Testing Record Type)

Stage	Definition
New Purchase	Patient Purchased
Waiting For Approval	Opportunity has been submitted for approval via Salesforce
Approved	Opportunity has been approved by order processing team
Needs More Information	Patient Provided Incomplete or Invalid Information
Kit Needs Sent	Order has been submitted and needing to be fulfilled and shipped to
Kit Sent	Kit has been shipped to patient
Pending Results	Kit has been sent back to the Lab and is waiting to be analyzed

Results Received	Results were received by 10X
Results Delivered To Client	Results were sent to patient

Lab Order Status Definitions

Status	Definition	Status Reasons	Definition
Ordered	The Lab has received a Kit request and is in process of shipping it to the patient.	<i>Kit Sent to Patient</i>	The Lab has sent the kit to the patient
		<i>Patient Received Kit</i>	The Patient has received the kit
		<i>Sample Received by Distribution</i>	This is PGT specific as the patient sends Kit back to Distribution Center and then they send Kit to the lab.
		<i>Kit Sent to Lab</i>	The Patient or Distribution Center has sent the kit to the lab
		<i>Pending Fulfillment</i>	Order has been sent but it hasn't been fulfilled.
Order Held	Something needs done on the order manually to allow the order to be processed.	<i>Consent Missing</i>	We do not have consent from the patient to process their DNA
		<i>Missing/Incorrect Shipping Information</i>	We need to gather the correct shipping address and update the opportunity.

		<i>Provider Invalid</i>	Lab Provider we set is not a valid provider for this service.
		<i>Mismatch Demographic Data</i>	The demographic data they entered on the release form doesn't match the DNA sample they sent.
		<i>Other</i>	Any unidentified errors.
		<i>See Error Message</i>	Any identified errors will show in the Error Message Field.
Cancelled Lab	Cancelled by the lab	• <i>Non-Supported State</i> • <i>Other</i>	• The state is not allowed by the lab • Anything else
Sample Received	The Lab has possession of the Kit and has confirmed it was received	<i>Analysis in Progress</i>	The Lab has started their analysis of the Kit
		<i>Analysis Complete</i>	The Lab has completed their analysis of the Kit
Rejected	The Kit was rejected by the Lab with not enough sample data	<i>Sample Invalid</i>	Sample was unable to be analyzed due to not enough genetic material
Results Held	Something prevented results from being delivered to the Patient.	<i>Missing Demographics</i>	The patient data is missing and 10x needs to do get the updated information.
		<i>Consent Missing</i>	We do not have consent from the

			patient to process their DNA
		PAM	There was something wrong and is need of human intervention. A case has been created in PAM for that team to resolve.
Results Delivered	Results were delivered to the patient via email or MyWellness portal.	<i>No Status Reason provided for this Status</i>	
Cancelled 10X	Cancelled by the 10x (refund or sent to another lab or reshipped)	Patient Refunded	The patient was refunded
		Changed Lab	10x changed the lab
		Swapped	2 or more patients swapped their kits.
		Reshipped	When a request for a new kit is sent to the same lab provider. Ex. bad delivery, kit never arrived.

Novogenia

Status	Definition
PERSONAL DETAILS – Registration completed	All Data has been checked and order is completed
SUPPLEMENTS - Order arrived	Confirmation Supplement ordered
WM - Order arrived	Confirmation Weight Management ordered

DNA SAMPLE - Recall enquiry	Laboratory was not able to finish analysis due to bad quality/criteria not met. New samples required
DNA SAMPLE – Sample arrived	Laboratory received DNA sample
DNA SAMPLE - Sample recalled	Employee informed customer/DC/WS that a new sample is required
DNA SAMPLE – Saliva sample started 1st try	First DNA Analysis started
DNA SAMPLE – Saliva sample started 2nd try	Second DNA Analysis started
DNA SAMPLE – Saliva sample started 3rd try	Third DNA Analysis started
DNA SAMPLE - To be recalled	Third Analysis was not successful – more DNA needed (terminated order)
DNA SAMPLE – Results Ready	Analysis was successful
REPORT – All results ready	All required results have been uploaded
REPORT – Report submitted	Report/Results transferred (Order ends here if no additional products)
PRODUCTION STARTED – Supplements	Supplement production started
PRODUCTION STARTED – WM	Weight Management production started
PRODUCTION - SHIPMENT SUBMITTED	Shipment handed to carrier
PERSONAL DETAILS - Details missing (waiting)	Order is missing details like DOB/Height/Weight/Delivery Option etc., Order is on hold and cannot be processed
PERSONAL DETAILS - Order canceled	Order is cancelled
PERSONAL DETAILS - 3rd Recall Enquiry sent	Employee reminded customer/DC/WS 3 times that new samples are needed
PERSONAL DETAILS - Inform KeyAccount	After 3 unsuccessful reminders, this status is set to inform our KeyAccount department to get directly in touch with DC/WS

PERSONAL DETAILS - On hold	Something is wrong with the order and has to be stopped. Analysis is still processed
REPORT – Notification	After Report has been sent out, this status triggers an automated e-mail

3PL

Status	Definition
Please Review Order	
Stage 0 - PGT Kit Awaiting Shipment	We have received the order via API and is waiting to be processed and shipped
Stage 1 - PGT Kit Shipped	PGT Kit has been processed and shipped
Stage 1.5 - Specimen Received with Exceptions	We have received the Specimen back from the Customer but has been deemed an Exception (Unregistered, Compromised, Cancelled, Held, etc.)
Stage 2 - Specimen Received and Shipped to Lab	We have received the Specimen back from the Customer and has been shipped to the Lab
Stage 3 - Lab Order Received	We have received the order via API and is waiting to be processed and shipped. Similar to Stage 1, but for the Supplements/Book
Stage 4 - Lab Order Shipped	Lab Order has been Processed and Shipped

ASC - Ovation

Status	Definition
ASC - NoMatch	
ASC - Not Received	
complete -Received	Results delivered to 10x
delivered -Received	Results delivered to 10x

held -Not Received	No sample at lab
held -Received	Issue with sample or patient information, check with PlexusDx
held -Rejected	Sample rejected. Check with 10x Dev to make sure rejection was received.
No Record in Plexus	
received -Received	Received / in processing, check with PlexusDx

ASC - PlexusDx

KIT_RECEIVED	WDNA_EXTRACTION_ACCEPTED when the kit is received by Tempus
QC_PASSED	Sample able to be processed (tube not cracked, swab not missing, etc.)
QC_FAILED	The sample could not be processed
DNA_EXTRACTION_ACCEPTED	The sample passes extraction during its first attempt (1-3 days for results delivery)
DNA_EXTRACTION_FAILED	Sample fails extraction
DNA_EXTRACTION_2ND_ACCEPTED	The sample passes its second extraction attempt
DNA_EXTRACTION_2ND_FAILED	Fails second attempt
GENOTYPING_ACCEPTED	Passes genotyping. data will be delivered shortly
GENOTYPING_FAILED	Fails genotyping
GENOTYPING_2ND_ACCEPTED	Passes the second attempt, data will be delivered shortly
GENOTYPING_2ND_FAILED	Fails second genotyping attempt
DATA_DELIVERED	Data delivery is complete

CANCELED	The sample will not be processed any further
